

Public Lectures In Astronomy

TUESDAY
APRIL 13th

The Magic of the Sun and Stars

Explore the wonders of our own Sun and countless other stars throughout the Universe

Prof John Brown (University of Glasgow and Astronomer Royal for Scotland) and Dr Lucie Green (Mullard Space Science Laboratory)

WEDNESDAY
APRIL 14th

How to Use a Million Astronomers - the Galaxy Zoo and Beyond

Discover how "Citizen Scientists" are helping to unravel the mysteries of how galaxies formed

Dr Chris Lintott (University of Oxford, and "The Sky at Night")

THURSDAY
APRIL 15th

Here is the Space Weather

Learn about the space environment and how its "weather" impacts on human technology

Dr Jim Wild (Lancaster University)

All Lectures are **FREE** and open to all ages, and begin at **7.30pm** in Room 257, Dept. of Physics and Astronomy, Kelvin Building, University of Glasgow.

For more information, and to obtain your **FREE** e-ticket, visit www.astr.gla.ac.uk/nam2010/pub.php
